CONDENSED CONSOLIDATED INTERIM

FINANCIAL STATEMENTS

For the Nine Months ended August 31, 2015

(Unaudited)

Notice of No Auditor Review

In accordance with National Instrument 51-102, Part 4, subsection 4.3(3)(a), the Company discloses that the unaudited condensed consolidated interim financial statements, and accompanying notes thereto, for the nine months ended August 31, 2015 have been prepared by and are the responsibility of the Company's management. They have been reviewed and approved by the Company's Audit Committee and the Board of Directors.

The Company's independent auditor, PricewaterhouseCoopers LLP, has not performed a review of these unaudited condensed consolidated interim financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants.

CHINA MINERALS MINING CORPORATION
(An Exploration Stage Entity)
Notes to Condensed Consolidated Interim Financial Statements
For the Nine Months ended August 31, 2015

1. NATURE OF OPERATIONS

China Minerals Mining Corporation (“China Minerals” or the “Company”) was incorporated in January 2006 under the laws of British Columbia, Canada as Hawthorne Resources Inc. and renamed as Hawthorne Gold Corp. in October 2006. In April 2011, the Company’s name was further changed to China Minerals. The Company’s registered office is Suite 1100 – 1111 Melville Street, Vancouver, British Columbia, Canada. China Minerals is listed on the TSX Venture Exchange under the trading symbol “CMV”. The Company and its subsidiaries are in the business of acquisition, exploration and development of mineral properties.

These consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to continue its operations for the foreseeable future and meet its obligations and commitments in the normal course of business. At August 31, 2015, the Company had an accumulated deficit of \$42,036,743 (November 30, 2014 - \$41,751,520).

As the Company is in the exploration stage, no mineral producing revenue has been generated to date. The ability of the Company to meet its obligations and continue the exploration and development of the properties is dependent upon its ability to continue to raise adequate financing. In the past, operating capital and exploration requirements have been funded primarily from private equity financing. While the Company has been successful in raising capital in the past there can be no assurance that such financing will be available to the Company in the amount required at any time or for any period or, if available, that it can be obtained on terms satisfactory to the Company. The Company continues to seek joint venture partners for its Cassiar projects.

2. SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of preparation

These condensed consolidated interim financial statements have been prepared on a historical cost basis and are in accordance with IAS 34 *Interim Financial Reporting*. They do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Company’s annual financial statements for the year ended November 30, 2014 which have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

These condensed consolidated interim financial statements were approved by the Audit Committee and authorized for issue by the Board of Directors on October 21, 2015.

(b) Basis of consolidation

These consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Cassiar Gold Corp. (“Cassiar”) and North American Mining Consulting Ltd. (“NAM”). The Company consolidates these subsidiaries on the basis that it controls these subsidiaries. Control is defined as the exposure, or rights, to variable returns from involvement with an investee and the ability to affect those returns through power over the investee. All intercompany transactions and balances have been eliminated on consolidation.

(c) Accounting judgments and estimates

The preparation of financial statements in accordance with IFRS requires management the use of certain critical accounting estimates and that impact the Company’s reported financial results. These estimates are based on past experiences and expectation of future events. Uncertainty on these judgments and estimates could result in material reassessments of the carrying amounts in the Company’s financial position.

The following two management judgments have the most significant effect on the financial statements:

Impairment of exploration and evaluation assets

Exploration and evaluation assets are considered for impairment when circumstances indicate that their carrying amount may not be recoverable. Assessment of impairment indicators involves significant judgments over internal and external factors. External factors include future commodity prices, investor sentiment and changes in environmental mineral tenure regulations. Internal factors include technical data interpretation of the mineral resources estimates and the Company’s exploration plans for the properties. As new data comes up and the economy continually changes, the recoverable amounts of the assets and the impairment loss might be different from these judgments and estimates.

CHINA MINERALS MINING CORPORATION
(An Exploration Stage Entity)
Notes to Condensed Consolidated Interim Financial Statements
For the Nine Months ended August 31, 2015

Asset retirement obligation ("ARO")

Provision on the retirement of the exploration and evaluation assets and site restoration is based on many assumptions and judgments: future estimated costs, expected amounts of cash flows to discharge the obligation, timing of such cash flows and the prevalent market discount rate. Any changes to the assumptions will result in an adjustment to the provision which affects the Company's liabilities and operating results.

(d) Changes in accounting policies

The Company has adopted the following new standards and their consequential amendments effective January 1, 2014: *IAS 36, 'Impairment of Assets'*, and *IFRIC 21, 'Levies'*.

The adopted standards and amendments did not have any impact on the Company's consolidated financial statements.

Standards and amendments issued but not yet effective up to the date of authorization of these consolidated interim financial statements are as below:

IFRS 9 'Financial Instruments' will replace *IAS 39 'Financial Instruments: Recognition and Measurement'*. IFRS requires financial assets to be classified into two measurement categories: at fair value and at amortized cost. The classification is determined at initial recognition. The standard is effective for annual period beginning on or after January 1, 2018.

IFRS 11 'Joint Arrangements' was amended on May 6, 2014. The amendments provide guidance on how to account for the acquisition of an interest in a joint operation that constitute a business and are effective for annual period beginning on or after January 1, 2016.

3. CASH AND CASH EQUIVALENTS

The Company's cash and cash equivalents are denominated in Canadian dollar, U.S. dollar and Chinese renminbi and the details are as follows:

	August 31, 2015	November 30, 2014
Cash at bank and in hand - Canadian dollars	\$ 30,893	\$ 70,158
Cash at bank and in hand - U.S. dollars	4,780	4,112

CHINA MINERALS MINING CORPORATION
(An Exploration Stage Entity)
Notes to Condensed Consolidated Interim Financial Statements
For the Nine Months ended August 31, 2015

For the nine months ended August 31, 2015, amortization of \$73,694 (2014 - \$83,659) was capitalized to exploration and evaluation assets and \$621 (2014 - \$1,811) was expensed to operations.

5. EXPLORATION AND EVALUATION ASSETS

Cassiar Project, British Columbia

The Company, through its subsidiary Cassiar Gold Corp., owns 100% of the Cassiar mineral assets. The Cassiar project, located in northern British Columbia, Canada, comprises approximately 58,900 hectares of mineral rights. The Cassiar project's two major areas of exploration and development activities to date are the Table Mountain and the Taurus properties.

Table Mountain Property

Table Mountain is a past-producing underground gold mine. The property has a fully permitted gold mill and tailings management facility which are available for future ore processing. In 2012, the Company carried out a drilling program on the area named the Sky Vein prospect for possible gold-bearing veins. In 2013, a short surface exploration program was conducted on the southwest part of the property. The goal of the exploration work was to further explore gold and other types of mineralization potentials.

On April 7, 2015, the Company received a technical disclosure review by the British Columbia Securities Commission ("BCSC") on its technical report on the Table Mountain property filed on May 26, 2010. The BCSC has identified certain material deficiencies in the Company's technical report. As such, the technical report is not in compliance with the requirements of National Instrument ("NI") 43-101. As a result, the Company was placed on the Commission's Issuers in Default list until a revised technical report is submitted. On April 15, 2015, the Company issued a news release disclosing the non-compliant report, and indicating that as the resource estimates in the report are not supported by NI 43-101, they should not be relied upon until such time as a compliant report is submitted. The Company has requested clarification on certain deficiencies identified by the BCSC. The Company's Qualified Person, Dale A. Sketchley, M.Sc., P.Geo, has reviewed the remaining deficiencies and a revised technical report is in the process.

Taurus Property

The Taurus property contains the Taurus gold deposit, a large gold system, located about 8 kilometres from the Table Mountain milling facility. In 2012, a drilling program was conducted on the property. The program focused on tests for extensions of the Taurus deposit to the east and south of the known mineralization as well as on infilling the internal gaps within the Taurus deposit.

In July 2013, the Ministry of Aboriginal Relations and Reconciliation (the "Ministry") advised the Company that it had signed an Incremental Treaty Agreement (the "ITA") with Kaska Dena Council which provides transfer of two Crown land parcels that cover part of the Company's subsurface rights over five of its mineral tenures (226148, 226149, 510750, 514937 and 617143) to Kaska Dena First Nations ("KDFN"). The ITA specifically excludes the subsurface rights, and the transfer will provide ownership to KDFN of the surface rights only. After the transfer date, access to and the conduct of mining activities on those portions of the claim located within the lands transferred to KDFN will continue with those rules applicable to claims located on privately owned lands.

During 2014, the Company contacted the Ministry expressing concerns over the transfer being processed without prior consultation with the Company and possible impact on Cassiar's exploration activities once the proposed transfer occurs. In December 2014, the Ministry informed the Company that the transfer had been put on hold. In January 2015, the Company and its legal counsel met with the Ministry over the issue. The Ministry maintained its position on the proposed transfer. On March 31, 2015, the land parcels for surface rights only were transferred to KDFN. In June 2015, the Company initiated judicial review proceedings whereby the court reviews the actions of government officials for any breach of their procedural duties. In addition, the Company is considering a claim under the Canada-China Foreign Investment Protection Agreement, pursuant to which each government has promised to abide certain standards of conduct to protect foreign investors' investments. The potential impact of the transfer is being assessed and could result in an impairment write down.

CHINA MINERALS MINING CORPORATION
(An Exploration Stage Entity)
Notes to Condensed Consolidated Interim Financial Statements
For the Nine Months ended August 31, 2015

The Company's expenditures on its exploration and evaluation assets were as follows:

	Nine months ended August 31, 2015	Year ended November 30, 2014
<i>Balance, beginning of the period</i>	\$ 18,834,105	\$ 18,764,216
<i>Acquisition and maintenance of mineral claims</i>	-	796
<i>Exploration costs</i>		
Amortization	73,694	111,545
Asset retirement (recovery) obligation	-	(75,947)
Environmental and permits	1,651	1,690
Consulting and professional	-	8,398
Share-based payments	-	(717)
Property tax, insurance and others	25,356	24,124
<i>Costs incurred during the period</i>	100,701	69,889
<i>Less: Mineral exploration tax credits</i>	(59,870)	-
<i>Balance, end of the period</i>	\$ 18,874,936	\$ 18,834,105

Certain Canadian provincial government authorities provide incentives to encourage mineral property exploration and development in their jurisdictions. Such incentives include reimbursements of qualifying expenditures to a Company's exploration activities. The expenditures claimed for rebate are subject to review, audit and approval by the government authorities. When the Company is advised that such rebate has been approved and will be made to the Company, the reimbursement is recorded as a recovery of the exploration and evaluation costs.

During the nine month ended August 31, 2015, the Company received British Columbia mining exploration tax credits ("BCMETC") from the Canada Revenue Agency in the amount of \$59,870 for reimbursements of its 2013 qualifying exploration expenditures on the Cassiar project. The exploration tax credit has been recorded as a reduction to the exploration and evaluation assets.

Asset Retirement Obligation ("ARO")

The Company has future obligations in retiring its exploration and evaluation assets at the Cassiar Property including dismantling, remediation and treatment of the site. The exact nature and costs of the obligation are subject to change because of the ongoing changes of environmental requirements enacted by government agencies.

The Company prepares estimates of the timing and amount of expected cash flows when an ARO will be incurred. The net present value of the ARO is initially recognized as a long-term liability and is added to the exploration and evaluation assets; and it is subsequently re-measured at each reporting period.

A continuity of the asset retirement obligation relating to the exploration and evaluation assets is as follows:

	August 31, 2015	November 30, 2014
Asset retirement obligation - beginning balance	\$ 1,275,890	\$ 1,313,150
Change in estimates	-	(75,947) (1)
Accretion expense	21,525	38,687
Asset retirement obligation - ending balance	\$ 1,297,415	\$ 1,275,890

(1) The Company revised its retirement obligation cost estimates after reassessing the expected timing of the abandonment of its properties including new inflationary data.

The total discounted cash flow estimated to settle the obligations as at August 31, 2015 was \$1,339,971 which was adjusted for inflation at the rate of 2% and then discounted at a risk free rate of 2.41%. Certain minimum amounts of ARO will occur each year with the significant amounts expected to be incurred in 2016.

At August 31, 2015, the Company has \$349,444 (2014 - \$349,444) in reclamation bonds with the Ministry of Energy and Mines of British Columbia as commitments to meet its regulatory obligations. The reclamation bonds are interest-bearing at prime rate less 1.8%, with \$85,000 maturing on February 13, 2016 and \$264,444 on August 15, 2016. The reclamation bonds are hypothecated and automatically renew upon maturity.

CHINA MINERALS MINING CORPORATION
(An Exploration Stage Entity)
Notes to Condensed Consolidated Interim Financial Statements
For the Nine Months ended August 31, 2015

6. SHARE CAPITAL

Authorized - unlimited number of common shares without par value

Issued and outstanding – see Consolidated Statements of Changes in Equity

Stock option plan

The Company has a stock option plan whereby the maximum number of common shares reserved for issue shall not exceed 10% of the total number issued and outstanding common shares of the Company as at the grant date. At August 31, 2015, the maximum remaining number of shares that may be reserved for issuance was 15,222,327. Options granted to investor relations consultants generally have one to two-year terms and are vested over a twelve-month period with 25% vested every three months from the date of grant. Options granted to directors, officers, employees and consultants have a five-year term and a vesting period of eighteen months with one-third vested every six months from the date of grant.

Stock options

The continuity of the Company's stock options to August 31, 2015 is as follows:

	Number of options	Weighted average exercise price
Balance, December 1, 2013	5,159,600	\$ 0.19
Expired	(1,244,600)	(0.40)
Forfeited	(150,000)	(0.14)
Balance, November 30, 2014 and August 31, 2015	3,765,000	\$ 0.13

At August 31, 2015, the Company's outstanding stock options are as follows:

Number of Options Outstanding and Exercisable	Weighted Average Remaining Contractual Life (Yr)	Weighted Average Exercise Price	Expiry Date
1,655,000	0.60	0.16	April, 2016
500,000	0.91	0.12	July, 2016
1,610,000	1.79	0.10	June, 2017
3,765,000	1.15	0.13	

7. RELATED PARTY TRANSACTIONS

For the nine months ended August 31, 2015, the Company was charged office rents of \$11,948 (2014 - \$31,870) in regards to its Beijing subsidiary's office lease with Beijing Mansion No. 1 Real Estate Ltd. ("Beijing Mansion"). The office lease with Beijing Mansion was terminated in February 2015. As of August 31, 2015, the Company had no outstanding amounts (2014 - \$nil) owed to its related party.

Beijing Mansion is considered a party related by way of a director and shareholder in common. The related party expenses were recorded at the exchange amounts as determined and agreed to by the parties. Balances with related parties are non-interest bearing, unsecured and payable on demand.

8. COMMITMENT AND CONTINGENCY

- a) The Company has a commitment of \$11,100 on its Vancouver office lease which will expire on August 31, 2016.
- b) On September 2, 2015, the Company received notice from the British Columbia Environment Health Services ("Health Services") that the Health Services had received a complaint from a BC Hydro manager in respect of the camp facilities at the Cassiar Project, which facilities were being leased to the Jade City BC Hydro Work Camp (the "Facilities") through a third party (the "Lessee"). The complaint held that a break had occurred in the sewer line at the Facilities, and as a result, there was evidence of a discharge of domestic sewage to both land and nearby drinking water. Consequently, the sewerage and water systems on the property have been discontinued, the existing sewerage system is to be repaired or replaced prior to reuse or before June 30, 2016, and a new water system be constructed prior to reuse or before June 30, 2016. The cost of remediation is estimated at \$65,000. The Company is of the opinion that the damage was caused by the lessee who rented the Facilities

CHINA MINERALS MINING CORPORATION
(An Exploration Stage Entity)
Notes to Condensed Consolidated Interim Financial Statements
For the Nine Months ended August 31, 2015

from May to October, 2015, and upon consultation with legal counsel, has determined that the outcome of legal action is indeterminable, and as such, no liability has been recorded in respect of this matter.

9. SEGMENTED INFORMATION

Operating segment

The Company has one operating segment, being the acquisition, exploration and evaluation of mineral properties.

Geographic segments

The Company has two geographic segments - Canada and China. Their assets, liabilities, expenses and other income are as follows:

	Nine months ended August 31, 2015		
	Canada	China	Total
Current assets	\$ 487,017	\$ 11,250	\$ 498,267

GENERAL

China Minerals Mining Corporation ("China Minerals" or the "Company") was incorporated in January 2006 under the laws of British Columbia, Canada, as Hawthorne Resources Inc. and renamed as Hawthorne Gold Corp. in October 2006. In April 2011, the Company's name was further changed to China Minerals. China Minerals is listed on the TSX Venture Exchange under the symbol "CMV". The Company, an exploration stage entity, is in the business of acquisition, exploration and development of resource properties.

This Management's Discussion and Analysis ("MD&A") of the Company has been prepared on the basis of available information up to the date of this report, October 21, 2015, and should be read in conjunction with the Company's condensed consolidated interim financial statements for the nine months ended August 31, 2015, as well as the audited financial statements for the year ended November 30, 2014.

The financial information disclosed in this MD&A has been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("ISAB"). All monetary amounts are expressed in Canadian dollars unless stated otherwise.

The Company's shares are listed on the TSX Venture Exchange under the symbol "CMV", and quoted on the Pink Sheets in the United States under the symbol "HWTHF". Additional information is available on SEDAR at www.sedar.com and on the Company's website at www.chinamineralsmining.com.

FORWARD-LOOKING STATEMENTS

Information and statements contained in this MD&A that are not historical facts are forward-looking information within the meaning of National Instrument 51-102 *Continuous Disclosure Obligations* of the Canadian Securities Administrators that involve risks and uncertainties.

This MD&A contains forward-looking statements, such as estimates and statements regarding the Company's goals and future plans, including words to the effect that the Company expects a stated result or event to occur. These forward-looking statements are subject to known or unknown risks and uncertainties that could cause actual results or performance of the Company to differ materially from results implied by such forward-looking information. Factors that could cause the actual results to differ include commodity price fluctuations, market capital access, global economy and politics, government regulations, environmental restrictions, exploration results, mineral title disputes, limitation on insurance coverage and availability of consultants delivering timely services, as well as those factors discussed in the section entitled "Risks and Uncertainties" in this MD&A.

Although the Company has attempted to identify important factors that could affect the Company or may cause actual actions, events or results to differ, there may be other causing factors out of the Company's anticipation or estimation. Forward-looking statements contained herein are made as of the date of this MD&A and the Company disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events or results otherwise. Accordingly, readers are advised not to place undue reliance on forward-looking statements.

DESCRIPTION OF BUSINESS

The Company and its wholly owned subsidiaries, Cassiar Gold Corp. ("Cassiar") and North American Mining Consulting Ltd., are engaged in the exploration and development of mineral properties. The Company's main asset is the Cassiar Gold Project comprising the Table Mountain Property ("Table Mountain") and Taurus Property ("Taurus"), of which it owns 100% through its subsidiary, Cassiar.

The Company has conducted an extensive review of its mineral assets at Table Mountain and Taurus. The evaluation suggests that intensive exploration expenditures are required to prove up the asset potential and to further advance the projects. As such, an 8,200 metre exploration-focused drilling campaign was carried out during the summer of 2012. The completed drilling program comprised 43 drill holes at Taurus and 10 drill holes at Table Mountain.

At Taurus, the 2012 drill holes were designed to a) test for down dip and along strike extensions to high-grade intercepts identified in the historic drill hole database, b) step-out into peripheral, open areas of the deposit, and c) infill, internal gaps in the deposit. In general this program succeeded in demonstrating the presence of gold-bearing veins and structures well outside the known deposit area. Drill-testing adjacent to high-grade intercepts met with mixed success.

At Table Mountain, the 2012 drill holes tested the Sky Vein prospect – a little-drilled but significant east-west trending structure known to contain gold-bearing veins in a setting very similar to the past-producing vein deposits on the property. Five of the ten drill holes encountered significant (> 10 m true width) veins below the Table Mountain thrust; however, assays are variable and inconclusive.

In 2013, the Company carried out a short surface exploration program on the southeast part of the Cassiar properties where geological mapping, prospecting and silt-sampling were conducted. A geologist and a crew of three technicians completed the short field program under the supervision of the Chief Geologist. A total of 150 silt samples and 83 soil samples were taken as well as 22 outcrop rock samples showing alteration and/or veining.

The purpose of the field exploration program was to search for more Table Mountain style gold vein systems on the 50 km² Hunter-Pooley claims area. Some low grade veins are known to exist in the north western portion of the claims, but much of this area is under explored. The expenditure amounts on the program have been applied in April 2014 as exploration work assessment credits to extend the expiry dates of Cassiar's mineral claims.

In addition to a short surface exploration program in 2013, the Company also engaged Dale A. Sketchley, M.Sc., and P.Geol. a specialist in gold resource evaluation with experience in the Cassiar Gold camp, to complete an in-depth evaluation of the Taurus gold deposit. His assessment report was to evaluate resource opportunity at Taurus and determine if further work could increase gold resources on the complex Taurus gold deposit.

EXPLORATION AND EVALUATION ASSETS

Dale A. Sketchley, M.Sc., P.Geol., the Company's advisor and a Qualified Person as defined by National Instrument ("NI") 43-101, has reviewed and approved the technical information contained in this MD&A.

Cassiar Gold Project, British Columbia

The Cassiar Gold Project is located in northern British Columbia. It comprises approximately 58,900 ha (including 217 mineral claims and 2 placer claims) of which the Company has 100% interest, which comprise the Table Mountain and Taurus Properties in the Liard Mining Division. The area is easily accessible by an all-weather road along Highway 37, which runs through the center of the Cassiar properties, and by subsidiary roads that allow easy access to many parts of the projects. The area can also be accessed via fixed-wing aircraft flights to the Cassiar airstrip which lies immediately to the west of the Taurus Property near the old Cassiar town site. The Company owns an accommodation facility on Highway 37 in Jade City, British Columbia, located between Table Mountain and Taurus that can accommodate up to 70 people. An office and a core logging facility are located to the southwest of the camp area.

Approximately 425,000 ounces of gold have historically been produced from the Cassiar district, mainly from underground mines on the Company's current land holdings on the Table Mountain Property. Gold mineralization is of the orogenic (mesothermal) gold type, and has many similarities in mineralization style and geological controls to the Cariboo Gold district in British Columbia, the Mother Lode belt of California, and to gold deposits of the Abitibi Greenstone belt in Ontario. Mineralization occurs in mafic volcanic-hosted, steeply dipping quartz-sulphide-carbonate vein systems which splay off shear zones that are developed in stacked thrust fault surfaces localized along carbonate altered ultramafic rocks and carbonaceous sedimentary rocks.

In 2009, the Company entered into a Resource Funding Agreement with the First Nation Kaska Dena Council on behalf of the BC Kaska in connection with the continued exploration and development of the Cassiar Gold Camp. Under the Agreement, China Minerals has agreed to provide resource funding to the BC Kaska to contribute to the cost of negotiating a Traditional Knowledge Protocol (the "TK Agreement") and a Socio-Economic Participation Agreement (the "SEPA"). The TK Agreement will assist the parties in establishing the appropriate traditional knowledge protocols for the exploration and development of the Property. The SEPA would include environmental, cultural, socio-economic and business opportunities and benefits for members of the BC Kaska and their businesses.

In January 2012, the Company initiated a systematic compilation and evaluation of the data available for the Cassiar Gold Project. In spite of gaps in historic reporting, the Company amassed a coherent database comprising 2,418 drill hole collar locations (521 Taurus; 1,897 Table Mountain), 48,862 drill hole lithological intervals (15,486 Taurus; 33,376 Table Mountain) and 81,466 gold assay results (54,424 Taurus; 27,042 Table Mountain). Collectively, this database represents 259,814 m of drilling including 201,187 of surface and underground drilling at Table Mountain and 58,627 m of surface drilling at Taurus.

This database formed the basis for target evaluation and recommendation for the 2012 summer drilling program. Additionally, areas for historic core re-sampling and re-logging were identified.

Table Mountain Property

The Table Mountain Property is located south of Highway 37 within the southern parts of the Cassiar Gold Project and contains the Main (formerly Erickson), Bain, Cusac and Vollaug mines, which are past producing underground high-grade gold mines. A permitted 270 tonne per day gravity/flotation mill, power plant, assay lab and tailings impoundment facility are located on the property, and were put under care and maintenance by previous owners in October 2007. Thirteen adits/portals, approximately 25 km of underground workings, and more than 23 km of surface access roads occur on the property.

Table Mountain contains several areas hosting NI 43-101 compliant resources supported by a technical report (the "Table Mountain Report") titled, "Technical Report on the Table Mountain Property, Liard Mining District, British Columbia" prepared by Clifford A. Pearson, P. Geo, and Finley J. Bakker, P. Geo, which was filed on May 26, 2010 at www.sedar.com. In April 2015, the Company received a letter from British Columbia Securities Commission ("BCSC") advising that the above technical report has deficiencies as one of the authors, Finley J. Bakker, is not independent within the meaning of NI 43-101. Additionally, incorrect reporting formats were used. The Company has requested clarification on certain deficiencies identified by the BCSC. Dale A. Sketchley, M.Sc., P.Geo., the Company's Qualified Person, has reviewed the remaining deficiencies and is in the process of preparing a revised technical report. Resources occur principally in the Bain and Cusac mine areas, and include an indicated resource of 21,471 tonnes at an average grade of 18.02 g/t Au (approximately 12,440 troy ounces of gold) and an additional inferred resource of 19,306 tonnes at an average grade of 31.76 g/t Au (approximately 19,714 troy ounces of gold) in the East Bain system. Additional resources occur in the Cusac mine, mainly in the Eileen vein system. A summary of resources on the Table Mountain property that are derived from the Table Mountain Report are summarized in the table below:

Category	Tonnes	Au uncut g/t	Au cut g/t	Density
Indicated Total	21,471	18.02	16.24	2.70
Inferred Total	65,757	24.30	20.12	2.70

A feasibility study has not been completed on the Table Mountain property and there is no certainty that economically viable mining is possible.

During the year ended November 30, 2012, ten exploration drill holes for 1,340 m were completed at the Sky Vein prospect ("Sky Vein"). Sky Vein is hosted in a steeply-dipping fault / shear structure which splays from the shallowly dipping Table Mountain Thrust. The thrust structure separates overlying argillite sedimentary rocks from underlying basalt and locally the thrust contains strongly hydrothermally altered ultramafic rocks (listwanite). This is a similar geological setting to the veins exploited, for example, at the Main and Cusac mines. Sulphide-bearing quartz veins from 8.30 to 30.10 m true width were encountered in five of the ten 2012 drill holes. Assay results were generally low from these quartz intersections, however, wallrock adjacent to this vein returned up to 1.91 g/t Au over 12.50 m.

Taurus Property

The Taurus Property is located north of Highway 37 within the northern parts of the Cassiar Gold Project. The Property contains the Taurus Gold Deposit ("Taurus Deposit"), a large gold system that has been the focus of recent exploration on the project. The Taurus Deposit is located approximately eight kilometres from the company's milling facility, and is located along the main access road to the former town of Cassiar. It lies low in the valley in an area of subdued topography, allowing year round exploration and ease of access. The Taurus underground mine produced approximately 35,000 ounces of gold from eastern portions of the Taurus Deposit in the 1980s. The Taurus Deposit was explored by previous operators with the objective of evaluating the potential for both large tonnage open pit and high grade underground mines. Sable Resources Ltd. holds a 2.5% Net Smelter Return Royalty (NSR) on a group of ten claims (Mack 1 to 4, Hopeful 1 to 4, Hillside and Highgrade) on the Taurus Property, which cover a part of the Taurus Deposit.

The Taurus Deposit hosts an inferred resource of 1.06 million ounces of gold comprising of 33.1 million tonnes at an average capped grade of 0.99 g/t Au using a cut-off grade of 0.50 g/t Au. This resource is supported by the NI 43-101 technical report titled "Updated Resource Report on the Taurus Deposit – Liard Mining District, B.C." prepared by Thomas C. Stubens and Morinus Andre de Ruijter of Wardrop Engineering Inc., which was filed at www.sedar.com on March 11, 2009.

After a review of the Taurus database in early 2012, the Company developed a three dimensional model of the major planar fault and shear structures and identified several target areas. The Taurus deposit is open in several directions around the periphery of the deposit but also internal to the known deposit footprint. Additionally, several targets were identified to have potential for higher-grade mineralization.

Between June and August 2012, the Company completed 43 drill holes for 6,857 m of drilling at Taurus utilizing a single, skid-mounted drill. These holes targeted open areas of the Taurus deposit and potential higher-grade zones. Concurrent with the drilling, geological crews re-logged 69 historic drill holes within and proximal to drill targets to refine structural models.

Drill results announced in the Company's news releases dated September 18, October 2 and October 24, 2012 from Taurus include several holes designed to test open areas of the Taurus Deposit, which intersected ankerite altered basalt with veins, associated sulphide mineralization and gold mineralization. Some of the highlighted results include:

- Holes TA12-16 and TA-19 intersected, respectively, 8.80 m at 5.05 g/t Au and 19.00 m at 2.13 g/t Au outside previous eastern boundary of Taurus deposit
- A high grade vein grading 8.77 g/t Au over 1.80 m in hole TA12-24 demonstrates that gold mineralization at the

Sable Zone extends to the south-east

- Wide gold intersections of 23.00 m grading 3.83 g/t Au and 10.45 m grading 4.42 g/t Au in holes TA12-38 and TA12-40, respectively, show new opportunity in the 88 Hill / Highway Gap

In July 2013, the Ministry of Aboriginal Relations and Reconciliation (the "Ministry") advised the Company that it had signed an Incremental Treaty Agreement (the "ITA") with Kaska Dena Council which provides transfer of two Crown land parcels that cover part of the Company's subsurface rights over five of its mineral tenures (226148, 226149, 510750, 514937 and 617143) to Kaska Dena First Nations ("KDFN"). The ITA specifically excludes the subsurface rights, and the transfer will provide ownership to KDFN of the surface rights only. After the transfer date, access to and the conduct of mining activities on those portions of the claim located within the lands transferred to KDFN will continue with those rules applicable to claims located on privately owned lands.

During 2014, the Company contacted the Ministry expressing concerns over the transfer being processed without prior consultation with the Company and possible impact on Cassiar's exploration activities once the proposed transfer occurs. In November 2014, the Company met with the Ministry's representative to discuss the issue. In December 2014, the Ministry informed the Company that the transfer had been put on hold. In January 2015, the Company and its legal counsel met with the Ministry over the issue. The Ministry maintained its position on the proposed transfer. On March 31, 2015, the land parcels for surface rights only were transferred to KDFN. In June 2015, the Company initiated judicial review proceedings whereby the court reviews the actions of government officials for any breach of their procedural duties. In addition, the Company is considering a claim under the Canada-China Foreign Investment Protection Agreement, pursuant to which each government has promised to abide certain standards of conduct to protect foreign investors' investments. As at October 21, 2015, the date of this MD&A, the judicial review is still in the progress. The potential impact of the transfer is being assessed and could result in an impairment write-down.

OUTLOOK

The Company has no current funding for exploration of its mineral projects. Management is monitoring the economic conditions of the mining industry and continues discussions with investors in the economic viability of extracting gold residues from the tailings pond of its former producing mine at Table Mountain property. For fiscal year 2015, the Company remains prudent on managing its cash reserves.

SUMMARY OF QUARTERLY RESULTS

The table presented below highlights the Company's unaudited quarterly results for the last eight quarters.

	2015			2014			2013	
	Aug 31	May 31	Feb 28	Nov 30	Aug 31	May 31	Feb 28	Nov 30
	\$	\$	\$	\$	\$	\$	\$	\$
Revenue	-	-	-	-	-	-	-	-
Net loss	(44,579)	(70,766)	(169,878)	(253,310)	(144,064)	(176,086)	(155,020)	(325,113)
Net loss per share - basic and diluted	(0.00)	(0.00)	(0.00)	(0.00)	(0.00)	(0.00)	(0.00)	(0.00)

The Company has not yet generated revenue as it is at the exploration stage. The Company's expenditures have been reduced year-over-year, from an average of \$330,000 per quarter in 2013 to quarterly averages of \$182,000 and \$95,000 in 2014 and 2015 respectively.

REVIEW OF FINANCIAL RESULTS

(Rounded to the nearest thousand ('000))

Net Loss

For the three and nine months ended August 31, 2015, the Company incurred net losses of \$45,000 and \$285,000 respectively as compared to \$144,000 and \$475,000 for the same respective periods in 2014. Details of the Company's expenses and other income are described below.

Expenses

Administrative expenses for the three and nine months ended August 31, 2015 were \$90,000 and \$358,000 (2014 - \$185,000 and \$662,000) respectively. The major expenses reduced for the nine months period were: director and executive fees lowered by \$36,000 as a result of the CEO's reduced compensation, rent and office expenses by \$241,000 from the closure of its subsidiary in Beijing, China. Professional and consulting fees, however, were increased by \$17,000 due to the matter with the Ministry of Aboriginal Relations and Reconciliation over the transfer of two Crown land parcels to Kaska Dena First Nation.

Other Income (Expenses)

For the three and nine months ended August 31, 2015, other income and expenses were \$45,000 and \$72,000 (2014 - \$41,000 and \$187,000) respectively. Other income in 2014 included the rental income from subleasing the Company's Vancouver office and the provision of office administrative services to a sub-tenant. Both agreements ended in 2014.

Exploration and Evaluation Assets Expenditures

The Company capitalizes expenditures incurred in connection with the acquisition and exploration of its mineral property interests. In April 2015, the Company received a mineral exploration tax credit ("METC") of \$60,000 which had been recorded as a reduction to the exploration and evaluation assets. At August 31, 2015, the carrying value of the Company's mineral assets was \$18,875,000, net of METC (2014 - \$18,834,000). The Company has not planned any exploration activities for 2015. Continuity of the exploration and evaluation expenditures is disclosed in Note 5 to the condensed consolidated interim financial statements as at August 31, 2015.

LIQUIDITY AND CAPITAL RESOURCES

At August 31, 2015, the Company's cash and cash equivalents were \$389,000 compared to \$662,000 at November 30, 2014; and its short-term investments were \$11,500 for both fiscal years of 2015 and 2014. The Company's working capital at August 31, 2015 was \$482,000 (November 30, 2014 - \$707,000).

To preserve its cash reserves, the Company continues reducing its operating expenses. For fiscal year 2015, management has budgeted \$445,000 for its operations. As at August 31, 2015, the Company has sufficient financial resources to meet its obligations for the next nine months until May 31, 2016. The Company's ability to continue as a going concern will depend on its ability to raise equity or debt financing.

For the exploration and evaluation assets, the Company has no planned funds for the coming year's exploration activities. Discussions with an investor in exploring the economic viability of extracting gold residue in the tailings pond at the Table Mountain mine where historical production occurred are still in progress.

Under operating activities, the Company used \$311,000 of its cash for the nine months ended August 31, 2015 compared with \$602,000 for the same period in 2014.

In the investing activities, the Company incurred \$32,000 on the exploration and evaluation asset for the three quarters ended August 31, 2015 (2014 - \$44,000). The expenditures were primarily amortization of camp assets, permits and maintenance costs for the properties.

The Company has no long-term debt obligations or off-balance sheet arrangements. However, the Company has a commitment to an office rental in Vancouver, which are disclosed below under "Commitment and Contingency".

The Company's exploration and evaluation assets are at the exploration stage and will not generate cash flow in near term; accordingly, the Company will depend on equity/debt financings to continue its exploration activities and general administrative requirements. There is no assurance that the Company could raise such financings and on reasonable economic terms.

COMMITMENT AND CONTINGENCY

The Company has a commitment of \$11,100 to an office lease in Vancouver expiring on August 31, 2016.

On September 2, 2015, the Company received notice from the British Columbia Environment Health Services ("Health Services") that the Health Services had received a complaint from a BC Hydro manager in respect of the camp facilities at the Cassiar Project, which facilities were being leased to the Jade City BC Hydro Work Camp (the "Facilities") through a third party (the "Lessee"). The complaint held that a break had occurred in the sewer line at the Facilities, and as a result, there was evidence of a discharge of domestic sewage to both land and nearby drinking water. Consequently, the sewerage and water systems on the property have been discontinued, the existing sewerage system is to be repaired or replaced prior to reuse or before June 30, 2016, and a new water system be constructed prior to reuse or before June 30, 2016. The cost of remediation is estimated at \$65,000. The Company is of the opinion that the damage was caused by the lessee who rented the Facilities from May to October, 2015, and upon consultation with legal counsel, has determined that the outcome of legal action is indeterminable, and as such, no liability has been recorded in respect of this matter.

OUTSTANDING SHARE DATA

As at October 21, 2015, the date of this MD&A, the Company's issued and outstanding common shares were 189,873,268; its share purchase options granted to directors, employees and consultants were 3,765,000 with a weighted average exercise price at \$0.13 per share. For additional details on share capital, see Note 6 of the condensed consolidated interim financial statements for the nine months ended August 31, 2015.

PROPOSED TRANSACTIONS

The Company does not have any proposed transactions as at the date of this report.

SUBSEQUENT EVENTS

There are no events subsequent to August 31, 2015 that have not been included in this report.

CHANGES TO THE BOARD OF DIRECTORS

In May 2015, China Minerals appointed Ms. Jeannine Webb as a Director of the Company. Ms. Webb replaced Mr. Harvey Brooks in June 2015 as the Chairman of the Audit Committee after Mr. Brooks did not seek re-election at the Company's Annual General Meeting held in June 2015.

RELATED PARTY TRANSACTIONS

For the nine months ended August 31, 2015, the Company was charged office rents of \$11,948 (August 31, 2014 - \$31,870) in regards to its Beijing subsidiary's office lease with Beijing Mansion No. 1 Real Estate Ltd. ("Beijing Mansion"). The office lease with Beijing Mansion was terminated in February 2015. As of August 31, 2015, the Company had no outstanding amounts (2014 - \$nil) owed to its related party.

FINANCIAL INSTRUMENTS

The Company's financial instruments comprise cash and cash equivalents, short-term investments, other receivables, and accounts payable and accrued liabilities. The fair values of the financial instruments referred to above approximate their carrying value due to their short term maturity, with the exception of accounts payable, for which the fair value may be lower than their carrying values as a result of the Company's credit and liquidity risk.

The Company is exposed to certain financial risks and the material ones are liquidity risk and credit risk. The Company's overall risk management is to maintain its ability to continue as a going concern.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations and commitments as they come due. At August 31, 2015, the Company has an accumulated a deficit of approximately \$42 million and no sources of revenue.

The Company manages its liquidity risk with an annual budget to identify the timeline and amounts of its financial requirements. By monitoring the monthly actual expenditures against the budget, the Company ensures it has the control and flexibility to meet its operating obligations. Based on the 2015 budget authorized by the Board of Directors, the Company has sufficient cash reserves to meet its 2015 operational obligations. The Company continues to source funding for its exploration activities and administrative expenditures through equity/debt financings. As at August 31, 2015, the Company had cash resources of approximately \$389,000 to settle current liabilities of approximately \$16,000.

Credit risk

Credit risk arises from cash and cash equivalents and short-term investments held with financial institutions as well as credit exposure on outstanding receivables.

The Company's cash and cash equivalents and short-term investments are held at high-credit rating financial institutions. The Company's maximum exposure to credit risk is the carrying amounts of cash and short-term investments on its consolidated financial statements.

CRITICAL ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the Company's financial statements requires management to make estimates and judgments that affect the reported amounts of the Company's financial position and operating results. Estimates are based on various assumptions such as expectations of future events that are believed to be reasonable under the circumstances.

The following is considered to be essential to the understanding of the estimates and judgments used in the preparation of the financial statements. Due to the uncertainties and volatile changes in the industry, actual results could differ from management's estimates which could impact significantly the Company's financial position, operational results and cash flow.

Exploration and evaluation ("E&E") assets and Impairment assessment

Impairment assessment on the E&E assets involves the application of management's judgments over a number of internal and external factors. External factors include future commodity prices, investors' sentiment and changes in environmental and mineral tenure regulations. Internal factors include technical data interpretation of the mineral resources estimates and the Company's exploration plans for the properties. As new data comes up and the economy and market continually change,

the recoverable amounts of the assets and the impairment loss might be different from these judgments and estimates.

When impairment indicators are identified, an impairment loss is recognized for any amount by which the asset's carrying value exceeds its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and its value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. Value in use is determined as the present value of the estimated future cash flows expected to arise from the continued use of the asset in its present form and from its ultimate disposal.

CHANGES IN ACCOUNTING STANDARDS

The Company has adopted the following new standards and their consequential amendments effective January 1, 2014: *IAS 36, 'Impairment of Assets'* and *IFRIC 21 'Levies'*. The adopted standards and amendments did not have any impact on the Company's consolidated financial statements.

Standards and amendments issued but not yet effective up to the date of authorization of these consolidated financial statements are as below:

IFRS 9 'Financial Instruments' will replace *IAS 39 'Financial Instruments: Recognition and Measurement'*. IFRS requires financial assets to be classified into two measurement categories: at fair value and at amortized cost. The classification is determined at initial recognition. The standard is effective for annual period beginning on or after January 1, 2018.

IFRS 11 'Joint Arrangements' was amended on May 6, 2014. The amendments provide guidance on how to account for the acquisition of an interest in a joint operation that constitute a business and are effective for annual period beginning on or after January 1, 2016.

RISKS AND UNCERTAINTIES

Due to nature of the Company's business in mineral exploration and development, it is subject to various risks and uncertainties associated with the mining and extraction industry. If any of the following risks occur, the Company's going concern, operating results and financial position could be adversely impacted.

Exploration Risk

Mineral exploration activities are inherently risky. Few properties that are explored are eventually developed into producing mines. Exploration activities on the Company's Cassiar mineral properties have not yet resulted in discoveries of commercial mineralization to take the Company to the producing stage. If there are no further discoveries of mineral reserves, the Company may be forced to look for other exploration projects and abandon the existing properties.

Titles to Mineral Properties

The Company exercises due diligence with respect to determining titles to its mineral properties it has interests in and claims in good standing; however, there is no guarantee that titles to such properties will not be challenged, impugned or expropriated. In July 2013, the Ministry of Aboriginal Relations and Reconciliation ("the Ministry") advised the Company that it would be transferring two Crown land parcels to Kaska Dena First Nations. The proposed land transfer overlaps with the Company's five subsurface mineral tenures. The Ministry indicated that once the surface lands are transferred, the Company's access to and conduct of mining activities on those five overlapping subsurface claims will be abiding with those rules applicable to claims located on privately owned lands. In March 2015, the Ministry informed the Company that the land parcels had been transferred to Kaska Dena First Nation. The two lands under the transfer comprise 5.6 hectares which accounts for 0.01% of the Company's total mineral claims of 59,231 hectares. As a result of the transfer, the Company's title to mineral claims has been reduced by the above percentage.

Commodity Prices

The Company's future viability depends largely on the movement of the price of gold as the Company's mineral resources are primarily of gold. Gold prices have historically been volatile reacting to conditions beyond the Company's control, including international politics, economic crisis, global production, consumption pattern and speculative activities. These uncertainties and volatility could affect negatively the Company's ability to raise capital and its continual operation.

Global Economy and Share Price Volatility

The Company has no revenue from its operations and relies on the capital markets to raise equity financings for its exploration activities and operating expenses. The slowdown of growth in China have resulted in reduced demand of base and precious metals and a general drop in the share prices of many companies in the mining industry. As a junior mineral explorer, the Company's share price has been unavoidably affected by such volatile market conditions, which may not be necessarily related to the financial condition and underlying assets of the Company. For the Company's ongoing working capital and exploration activities, it relies on the issuance of common shares. The Company's depressed share price will cast a doubt on its ability to raise future equity financing.
